Jaws

AS-MEDALLIONAL	These jaws enable engraving on notary seals, medallions, coasters, paperweights, watches, pendants and other round objects.
	

AS-MEDALLIONPE	These jaws are similar to the normal metal jaws, but they're made out of PE in order to prevent damaging your precious objects.
	

AS-PINJAW	These jaws enable engraving on irregular-shaped and unique-sized items. Easy to modify for a special application.
-----------	---

AS-PENJAW	These jaws are used for holding pens. They have a slot for a pen clip on one side and a V-groove on the other edge.
-----------	---

AS-RULERJAWM	These flat jaws secure small flat items, such as name badges with pin backs. Like most others, these jaws are made of aluminium. Aluminium hardly wears out, so the jaws and vices don't lose their compatibility.
--------------	--

AS-5JAWKITM	Kit of 5 different jaws.
AS-4JAWKIT	Kit of 4 different jaws. (= AS-5JAWKITM without the AS-RULERJAWM jaw)
